01 About Ovlandra

A SOFTWARE COMPANY BUILT AROUND DELIVERY

Ovlandra Limited exists for teams that need software which works the day it ships — and keeps working a year later.

The work is practical: understand the workflow, design the right system, build it in working slices, and stay accountable for how it runs in production. We are not a generic technology brochure — engagements are run by senior engineers, scoped in plain language, and shaped around outcomes rather than ticket counts.

We operate across custom software, cloud platforms, security and governance technology, integrations, and data & AI workflows. Headquartered in Lagos, we work with organisations across Nigeria and internationally — remotely or onsite, end-to-end or alongside an existing technology team.

Our visual and engineering identity reflects how we work: deep carbon structure for discipline and depth, with precise mint signals for the fast, intelligent systems we build.

COMPANY FACTS	
LEGAL NAME	OVLANDRA LIMITED
TYPE	Private · Ltd by shares
INCORPORATED	20 May 2026
FRAMEWORK	CAMA 2020
RC NUMBER	9561385
HEADQUARTERS	Lagos, Nigeria
REACH	Nigeria & worldwide
ENGAGEMENT	Remote or onsite

02 How We Work

SHARP IN EXECUTION, STRUCTURED FOR SERIOUS WORK

01

Understand the work

We review the current process, users, data, pain points, and constraints before proposing a build.

02

Design the system

We define screens, data model, integrations, permissions, infrastructure, and acceptance criteria.

03

Build and test

We ship in working slices, test the important paths, and keep decisions visible as the system takes shape.

04

Launch and maintain

We help with deployment, monitoring, documentation, fixes, improvements, and ongoing support.

03 What We Do

ENGINEERING CAPABILITIES ACROSS THE DIGITAL STACK

Software Engineering

Custom web applications, dashboards, APIs, admin panels, workflow tools, and production systems your team can depend on — built clean and documented.

Cloud Infrastructure

Cloud platforms, hosting, and managed services — infrastructure setup, deployments, monitoring, backups, SSL, domains, and CI/CD pipelines.

Cybersecurity & GRC

Information security, identity, governance, risk and compliance technology — access control, security reviews, hardening, audit trails, and advisory.

Data & AI Workflows

Data engineering, analytics, dashboards, document workflows, retrieval systems, and custom AI & machine-learning orchestration.

Systems Integration

Application, data, and platform integration — connecting CRMs, payments, messaging, analytics, and the modernisation of legacy systems.

Managed Services

Design, build, operate, and manage digital products on your behalf — including outsourcing, managed service, and build-operate-transfer arrangements.

A build process with fewer surprises.

Every engagement starts with a plain-language scope — what gets built, who uses it, what it touches, and what must be true before it is done.

04 Company Particulars

OFFICIAL REGISTRATION & STATUTORY DETAILS

REGISTRATION	
REGISTERED NAME	OVLANDRA LIMITED
RC NUMBER	9561385
TIN	2622481349792
DATE INCORPORATED	20 May 2026
LEGAL FORM	Private company limited by shares
GOVERNING LAW	CAMA 2020 (Nigeria)
SHARE CAPITAL	₦ 5,000,000
REGISTERED OFFICE	Lagos, Nigeria

05 Business Objects

PRINCIPAL OBJECTS PER THE MEMORANDUM OF ASSOCIATION

- ✓ Designing, developing, deploying, maintaining, and supporting software applications and digital systems across all sectors.
- ✓ Cloud computing platforms, infrastructure, hosting, and managed technology services — designed, built, and operated for clients.
- ✓ Cybersecurity, information security, identity, governance, risk and compliance technology, products, advisory, and consulting.
- ✓ Designing, building, operating, and managing digital products under outsourcing, managed-service, and build-operate-transfer arrangements.
- ✓ Data engineering, data analytics, artificial intelligence, and machine-learning tools, products, and solutions.
- ✓ Technology consulting, software engineering, product management, and programme-delivery professional services.
- ✓ Systems integration, application and data integration, and the modernisation or replacement of legacy systems.

Let's talk about the work.

Share the workflow, problem, product idea, or system you want to improve — we'll help turn it into a clear technical plan.
